

CITY OF HOUSTON APPROVES ADS AND HANCOR PIPE FOR PUBLIC STORM SEWER

ENGINEERED TO OUTPERFORM

Superior Engineering:

ADS and Hancor produce N-12® WT and BLUE SEAL® superior HDPE pipe that provides the strength needed for tough applications. Not only does it offer the best watertight joint in the industry, but it offers abrasion resistance and won't rust or corrode like concrete or steel.

Advanced Drainage Applications:

HDPE pipe and fittings are used for cross drains, side drains, storm sewers, culverts, landfills and other installations across the country. Pipe and fittings are available in a wide range of sizes from 4" to 60" diameters for flexibility in all your projects.

High Performance Joints:

The watertight joints on N-12 WT and BLUE SEAL pipe do not require any extra couplers, grout or other sealants due to the patented, factory-installed gaskets. The integral bell and spigot joints on these pipes improve the tolerance control and integrity of the watertight seal.

City Approval:

The recently revised City of Houston Standard Specifications now allows high density polyethylene (HDPE) pipe for storm sewers within City right-of-way. Section 02631, Storm Sewers, identifies HDPE pipe as an approved material type for use on storm sewer systems associated with Local Streets. This includes installations under pavement as well as outside of the pavement. See Section 02317, Excavation and Backfill for Utilities, for further details. N-12 WT and BLUE SEAL pipe are produced in full compliance with City Standard Specification Section 02505, High Density Polyethylene (HDPE) Solid and Profile Wall Pipe.

Easy Installations:

The rugged, lightweight design of N-12 WT and BLUE SEAL makes them easier and more cost-effective to install. They require fewer people, less time and less heavy equipment to install compared to traditional material installations. All of these advantages add up to lower installation costs.

Outstanding Value:

N-12 WT and BLUE SEAL have many performance advantages over traditional pipe...at a fraction of the cost.
